Q: Cannot assign to type 'MyModel' because it is a 'value type' I have the following model: public class MyModel { public int Id { get; set; } public int FirstId { get; set; } public int SecondId { get; set; } public int ThirdId { get; set; } public int FourthId { get; set; } } But when I execute the following code: public ActionResult SaveModel() MyModel model = new MyModel(); model.FirstId =...; model.SecondId =...; model.ThirdId =...; model.FourthId =...; db.MyModels.Add(model); db.SaveChanges(); return View(model); It tells me: Cannot assign to 'FirstId' because it is a 'value type' Cannot assign to 'SecondId' because it is a 'value type' Cannot assign to 'ThirdId' because it is a 'value type' Cannot assign to 'FourthId' because it is a 'value type' If I

change the code like this: model.Id = 1; Then it works, but the Id is 0. How can I change the model to model.Id = 1? A: You can add the properties in your model: [Required] public int SecondId { get 82157476af
